

# HOOVER BAY ROAD ASSOCIATION

## Spring (not quite) 2008 Newsletter

It is time once again to look forward to spring and plan those holidays at the cabin. Thanks to having the road plowed and kept open this winter, a substantial number of residents were able to enjoy their cabins at Christmas, New Years and throughout the entire winter. While there are many signs of spring in the lower mainland, on Feb 16 at Canim there was still two feet of snow at the lake level and the lake was frozen over. For those members planning to go to the lake at Spring Break and Easter the road will be plowed and open.

The logging in the 1<sup>st</sup> section off the 6000 road was completed on Feb. 5<sup>th</sup>. The road didn't seem to be damaged from the trucks as it was mostly frozen when they were hauling. Once the snow melts, the Road Assoc. is planning on having the road graded and possibly graveled, depending on available funds.

**Fees are once again due. Please mail a cheque for \$100 to Hoover Bay Road Assoc., Box 483, 100 Mile House, B.C., V0K 2E0**

If you have new neighbors please make them aware of the road assoc. and the fee that is collected. The more members we have, the more improvements that we will be able to do to the road. Mike will be looking into the cost of brushing the road similar to what West Fraser did on the first section at the beginning of the logging last fall.

On a very sad note, two long time Cariboo families lost their sons on Christmas Eve in an avalanche on Spanish Mountain. Association members, Rodger & Ivy Henderson, lost their son Derek, and the Dillmon family lost their son Travis. Our deepest sympathy goes to both families.

There will be a road assoc. meeting on the Sunday of the May long weekend (May 18<sup>th</sup> 10:00 a.m.). The location will be posted on the information board on the road before the weekend. Work bees will be organized at that time and any ideas and concerns that members have will be discussed.

If you want information regarding the road, phone president Mike McNeil @ 250-791-5378 or e-mail [mike@newwavedocks.com](mailto:mike@newwavedocks.com). To save costs we would prefer to email Newsletters to members. If you have e-mail please forward your address to [s\\_ross@telus.net](mailto:s_ross@telus.net) Thanks
