

Hoover Bay Road Association

Announcement:

January 10th, 2010

We have been informed that the road was graded and winged back from the 6000 rd. to the airport on Wed. Jan 6, 2010.

December 24th, 2009

As of Dec 24th, the road is single lane, with no pull over's. Around the lake there is maybe 6" - 8" of snow and the bay is partly frozen. The attached photo is at the 1km mark. Notice the undercarriage of a class-c Chevy motor home on the right side of the photo. No license plates, does anyone know the history?

December 17th, 2009

Hi all.

For those interested in going to the lake for Christmas, I have been advised that road conditions are good from the 6000 Rd in. If anyone is out there this weekend, an update would be appreciated. I will forward to all anything we hear.

We wish everyone a very Merry Christmas and best wishes for the New Year.

Steve and Laurie Ross

December 2nd, 2009

Hello Everyone.

We want to let you all know that the road has been plowed from the 6000 Rd turnoff to the airport. The grader plowed and winged back the snow last Friday Nov. 27 . The plan is to have the grader go out 1 more time before Christmas if required. We would ask that anyone going out to the lake and returning to please let us know about road conditions. You can e-mail s_ross@telus.net or call Ivy&Rodger at 250-395-2867. Please be prepared for severe driving conditions at all times and travel at your own risk as conditions can change in a short period of time. We will give an update about a week before Christmas.

Thanks, Steve and Laurie Ross
